

Barry Moorhouse

Narrow gauge coaches

I haven't had much extra free time, as I have still been working full time (the construction industry hasn't closed down), but I have managed to do some model making. See pictures below.

The Vale of Rheidol coaches are 16mm scale, built from I P Engineering kits with Brandbright models bogies. These have been a very pleasant build, using woodworking tools and a bit more 'engineering' than model making, all makes a change from etched brass.

I now need to find some sanding sealer, and suitable top coat spray paints to finish them off.

I am also finally making some headway on my 7mm scale Wisbech & Upwell Tramway bogie coach (D&S Models), which has turned into more of a scratch build than a kit build!
